PERSONAL PROJECTS

E-commerce Website

- Designed and developed an E-commerce website using HTML, CSS, and JavaScript.
- Created a visually appealing and user-friendly website by utilizing CSS for the website's design and layout.
- Implemented JavaScript functionality for features such as product search, filtering, and checkout forms to provide a seamless user experience.
- Optimized the website for mobile devices, ensuring that users can access and navigate the site on their smartphones and tablets.

Notes Web-App

- Developed a Notes taking web app using HTML, CSS, and JavaScript that allows users to create, save, and edit notes in real-time.
- Created a responsive Notes taking web app using HTML, CSS, and JavaScript that automatically adjusts to fit any screen size, from desktop to mobile devices.
- Built a Notes taking web app using HTML, CSS, and JavaScript that features a clean and intuitive user interface for easy note-taking and organization.
- Designed and implemented a Notes taking web app using HTML, CSS, and JavaScript that leverages local storage to securely store user notes and settings across browser sessions.

Food Ordering Website

- Developed a fully functional food ordering website template using HTML, CSS, and JavaScript.
- Implemented a user-friendly interface that allows customers to easily browse and order from a variety of menu options.
- Incorporated features such as real-time order tracking and payment processing to streamline the ordering process.
- Utilized responsive design techniques to ensure that the website is accessible and functional across multiple devices.
